EDUCATION

National School of Applied Sciences of Fez (ENSA Fez) **Fez**
Computer Engineering (2nd year) 2024 – 2027
Courses: artificial intelligence, computer vision, information retrieval, algorithms and complexity.

National School of Applied Sciences of Fez (ENSA Fez) **Fez**
Integrated Preparatory Classes 2022 – 2024
Two intensive years covering advanced mathematics, physics, and the fundamentals of algorithms.

Mathematics Sciences Baccalaureate **Fez**
Advanced mathematics. 2021

Experience

Full Stack PHP (Laravel) Developer Intern **Casablanca**
COLLABORS IMPACT June 2025

- Developed a News module using Laravel (PHP), enabling the school to publish, edit, and display updates through a dedicated admin interface, while WordPress handled the overall site content management.
- Technologies: **WordPress, Laravel, HTML/CSS, JavaScript, MySQL**.

DevOps & Data **Casablanca**
ENSAF August 2025

- Designed and developed an automation chatbot to interact with deployment pipelines.
- Built Power BI dashboards to track project performance KPIs, improving visibility into progress and deliverable quality.
- Collaborated with technical teams to identify repetitive tasks and propose automation solutions using Python and Shell scripts.

SOUQ NET — Antiques marketplace with administrative approval **Casablanca**
Jan. 2026

- Developed a web platform for selling antiques featuring a centralized moderation system and a responsive user interface.
- Backend: **Node.js, Express.js, SQLite3, bcryptjs, express-session, Multer**, **REST** API, **MVC** architecture.
- Frontend: **HTML, CSS, JavaScript, EJS**, **Grid/Flexbox**, responsive design, **Font Awesome, Google Fonts**, CSS animations.

Academic Projects

T.U.R.I.N.G. **2026**

- Implemented the backend for the T.U.R.I.N.G. project, including building a data warehouse and ETL pipelines using **Spark** in a distributed big data environment with **Apache Hadoop**.
- Introduced data architecture improvements that increased batch processing performance by a factor of 10.
- Implemented regression testing strategies to identify and address potential issues, resulting in a more stable and reliable production application.
- Contributed to reorganizing the codebase to improve maintainability and readability using **SonarQube**.

Attendance Management Application (Java Spring) **2026**

- Responsive web application for absence management (recording and tracking) backed by a MySQL database.
- Technologies: **Spring Boot, Thymeleaf, JDBC, HTML/CSS, JavaScript, Git**.

SKILLS

- Languages: Golang - Python - Bash - Java - React - JavaScript/HTML/CSS - jQuery - SQL
- Libraries/Frameworks: React - Spring - Spark - Hadoop - Pandas - NumPy - Vue.js - Flask - Elasticsearch - PyTorch
- Tools: Linux - Git - Docker - Kubernetes - MySQL - Hive - MongoDB - Redis - Jenkins - SonarQube - Scrum - Agile Methodology
